The publication of our March 2020 Housing Market Report coincides with our 2020 Homeownership Conference. Both are focused on analyzing trends and influences on the state’s homeownership and rental housing markets.

At the conference, economist Russ Thibeault spoke about his housing needs assessment study – where we are, where we are headed and what we can do – which will come out this spring. Spoiler alert: We need 20,000 – 30,000 more housing units to meet the demand of our state’s workforce and continue our economic growth.

Our keynote speaker, John Anderson, described how small-scale development, particularly what is known as incremental development, can help our communities. This in-fill construction or the reuse of existing structures to create more housing and mixed-use buildings is one way we can add more housing.

We see incremental development as an opportunity for New Hampshire communities to enlist residents to develop and own buildings. These buildings, whether new or renovated, are smaller in scale, are more affordable to build and lease, and they generally fit more easily and naturally in non-urban community landscapes of the state.

In the fall and into 2021, we will be offering workshops on incremental development to raise awareness of it as a development option for communities. Following the workshops, we will sponsor a boot camp for would-be small developers to provide hands-on assistance. The boot camp will walk participants through the process of bringing a project from the drawing board to the planning board to construction and lease-up.

This time of year the legislature is in session and hundreds of bills are under review, some of which are of significance to housing development in the state. New Hampshire Housing works with other partners in support of legislation that will increase the state’s housing stock and streamline processes that impede development.

Our ongoing focus in the area of homeownership is working with a statewide network of lenders and real estate professionals to offer our single-family mortgage programs for home purchases, refinancing, and purchase-rehab. Used primarily by moderate-income homebuyers, our programs include downpayment and closing cost assistance, the Homebuyer Tax Credit Program, and discounted mortgage insurance.

Our goal continues to be to support a more inviting environment for housing development and the creation of homes that meet the needs of New Hampshire’s residents and support our growing economy.

“Missing Middle Housing” – a representation of incremental development – spans the gap between detached single-family homes to large apartment buildings. Diagram by Opticos Design, from IncrementalDevelopment.com.
I like to make chicken soup. You start with water, chicken, vegetables, herbs, etc. Initially, it is not that tasty. Then you let it simmer all day, and voila...it ends up as something to savor.

What does chicken soup have to do with housing, you ask? Good question. Soup goes through phases as you cook it. The watery phase, the phase where it starts to pick up the taste of the chicken and herbs, the adding salt phase (enough, but not too much), the getting rid of soggy vegetables phase, and finally, the boiled-down to its delicious essence phase. Ooh la la!

So here's the point...as housing consumers, we also go through phases – lifestyle phases. And we need a diversity of housing that's affordable to accommodate our dynamic lifestyles. What are these housing lifestyles phases? Something along these lines:

- Age 20-30 Millennials...pre-buyers
- Age 30-40 First-time buyers
- Age 40-55 Move-up market
- Age 55-65 Pre-retirement
- Age 65-80 Seniors/retirement downsizing
- Age 80+ Elderly (often needing supportive housing)

I've been reflecting on the housing my family has occupied as we've passed through life's phases—in-town double-deckers, several garden apartment complexes, a single-family home on a tiny in-town lot, and most recently a small condo in a 59-unit cluster development.

It then occurred to me that none of the dwellings that housed us so well over the years could be built under the large lot, single-family zoning dominating many New Hampshire communities.

When we talk about “housing needs” it's clear that one size doesn't fit all. New Hampshire's zoning should reflect that. Especially now when we are trying to balance our demographic profile with more young households and when boomers are looking to downsize.

Recently I was before a New Hampshire planning board speaking about a project that included some workforce housing. A board member asked a sincere question, “Why not make the entire project age-restricted? Wouldn't that be better for our town?”

Well, that might be like too much salt in the soup. Communities, like soup, need balance to accommodate our diverse lifestyles and changing demographics.

Our communities do need four-bedroom colonials on large lots, but they also need affordable apartments, starter homes, and cluster condominiums to attract young families and accommodate us as we pass through lifestyle changes. Development controls in many of our communities don't allow that diversity. I wish they did.

Accommodating housing needs, like making good soup, boils down to one word: balance.
TABLE OF CONTENTS

Perspectives on Housing Production ................................................................. 2 - 3
Economic Indicators ........................................................................................... 5
  • Unemployment Rate (US, New England, New Hampshire)

Front cover: Evelyn scoots around her neighborhood in Rochester in front of her new home (Robert Jenkins Photography); Wallace Farm Apartments (72 new units) in Londonderry, funded through NHHFA and the Low Income Housing Tax Credit program, will be completed in November; residents of Chandler Place Apartments in Plaistow enjoy a warm day on their front porch.
ECONOMIC INDICATORS

Economic indicators continue to reflect a strong economy in New Hampshire, with steady job opportunities. They also show household income has increased over the past five years but may be starting to slow.

UNEMPLOYMENT RATE (US, NEW ENGLAND, NEW HAMPSHIRE)
Seasonally adjusted

New Hampshire’s seasonally adjusted unemployment rate for December is 2.6%, which is where it has remained for the past three months. It is the nation’s sixth lowest unemployment rate. Our unemployment rate has been below 4% for the past five years. An unemployment rate of 4% or less is typically considered full employment.

MORTGAGE DELINQUENCY IN NEW ENGLAND
Q4, 2019
Source: National Delinquency Survey, Mortgage Bankers Association; prepared by NHHFA

Mortgage delinquencies in New Hampshire in Q4 2019 have remained consistent from last quarter. Currently, only 3.8% of all loans in the state have at least one payment past due, which is lower than other New England states except Vermont. The Mortgage Bankers Association announced that the mortgage delinquency rates in the final three months of 2019 fell to the lowest level in more than 40 years.

Foreclosures dropped 7.5% in Q4 2019 from the same period in 2018; annually, foreclosures dropped 15% in 2019 (731) when compared to 2018 (860). The increase in median sales price and lack of inventory within the state provides borrowers who cannot make their mortgage payments with a favorable market to sell their home, and thus avoid foreclosure.

ECONOMIC INDICATORS

COMPARISON OF INTEREST RATES

Mortgage interest rates have remained low over the last six months. They have not been this low since October 2016.

MEDIAN PURCHASE PRICE AND MEDIAN FAMILY INCOME

In years past, the price-to-income guideline for buyers was a home that cost two times their gross annual household income. Using HUD’s Median Family Income, the closest New Hampshire has ever come to that ratio was in 1992. With home prices in our current market historically high, first-time buyers now need approximately three times their annual household income to purchase a home.

Source: The Warren Group; filtered and analyzed by NHHFA; HUD Median Family Income for New Hampshire.
Prices and a low inventory of homes in New Hampshire makes homeownership challenging, especially for first-time buyers. Homebuyers face an extremely competitive market due to the inventory at most prices and a strong economy.

The median sales price reached a new peak in June 2019 of $300,000. This was 5.3% greater than the previous peak in June 2018. Overall, home prices are increasing. From December 2018 to December 2019, the median sales price increased 11.5%.

In 2019, total annual closed sales increased 1.4% from 2018. December 2019 saw a 21% increase in homes sold when compared with the same month in 2018.

In January, there were more homes in New Hampshire listed for over $300,000 than under. When compared to listings five years prior (January 2015), overall listings have dropped 41%. Listings priced over $300,000 have dropped only 8%, while listings under $300,000 have dropped 58%.

MLS CURRENT LISTINGS

Based on information from the Northern New England Real Estate Network and compiled by NHHFA. Excludes land, interval ownership, seasonal camps/cottages, multi-family property, mobile/manufactured homes and commercial/industrial property.

In January, there were more homes in New Hampshire listed for over $300,000 than under. When compared to listings five years prior (January 2015), overall listings have dropped 41%. Listings priced over $300,000 have dropped only 8%, while listings under $300,000 have dropped 58%.
HOME PRICES, INVENTORY & PERMITS

MLS HOUSING INVENTORY

Based on information from the Northern New England Real Estate Network and compiled by NHHFA. Excludes land, interval ownership, seasonal camps/cottages, multi-family property, mobile/manufactured homes and commercial/industrial property.

The supply of homes may be leveling as higher prices encourage more sellers and/or sales volume has slowed due to limited options in homes priced at $300,000 and below.

MONTHS OF SUPPLY OF INVENTORY

Based on information from the Northern New England Real Estate Network and compiled by NHHFA. Excludes land, interval ownership, seasonal camps/cottages, multi-family property, mobile/manufactured homes and commercial/industrial property.

Months of supply of inventory shows how many months it would take for the current inventory of homes on the market to sell, given the current pace of home sales. Active listings less than or equal to $300,000 had a high of eight months in August 2014. In December 2019, New Hampshire dropped to 1.6 months of supply of homes listed at or below $300,000.
The average square footage of new homes built for sale in the Northeast region has increased 76% in the past 45 years. Meanwhile, the average household size has decreased 23% from a high of 3.4 people in 1980 to 2.62 people in 2018.

The number of households in New Hampshire has grown 195% from 1960 to 2018. Annual permits for a 1-unit structure, or single-family homes, have not come back to the levels prior to the Great Recession, even with an increase in households.
**NH HOUSING PERMITS (SINGLE-FAMILY AND MULTI-FAMILY)**

Seasonally adjusted, 6-month moving average, through December 2019

Source: U.S. Department of Commerce, Construction Statistics Division

Single-family permits dropped 10% in 2019 when compared to 2018. In contrast, multi-family permits have increased by 16%.

**INDEX OF NH & US SINGLE-FAMILY HOUSING PERMITS ISSUED**

Seasonally adjusted, 6-month moving average, indexed, through December 2019. Index 12-month average of year 2000 = 100

Source: U.S. Department of Commerce, Construction Statistics Division

New Hampshire experienced a 43% increase in permit issuance annually in 2019 when compared to the annual low in 2009, yet a 7% decrease when compared to 2018. The number of single-family housing permits issued in the state remains behind the national average.
REAL ESTATE LISTINGS BY NH COUNTY

Listings as of 2/1/20.

Based on information from the Northern New England Real Estate Network and compiled by NHHFA. Excludes land, interval ownership, seasonal camps/cottages, multi-family property, mobile/manufactured homes and commercial/industrial property.

PROFILE OF NEW HAMPSHIRE HOUSING'S MORTGAGE BORROWERS

An adjustment factor (from Bureau of Labor Statistics) of 1.48 was used to convert 2000 dollar values into 2019 dollars.

Source: New Hampshire Housing Finance Authority, Homeownership Division
NEW HAMPSHIRE’S RENTAL MARKET

A tight rental market with very low vacancy rates, along with a strong state economy, was reflected in the NHHFA 2019 Residential Rental Cost Survey. Download the 2019 report at NHHFA.org. The 2020 report will be published in June.

The statewide median gross rent (including utilities) for a 2-bedroom unit has increased over 20% in the past 5 years.
The statewide median gross rent for a 2-bedroom unit in 2019 was $1,347; 78% of the rental units surveyed are in the southern tier (Hillsborough, Rockingham, Merrimack, and Strafford counties) and they have the highest median gross rents overall. The rental costs seen in Grafton County are driven by the market in the Hanover/Lebanon area.
New Hampshire Housing’s annual Residential Rental Cost Survey is underway. The survey is conducted on our behalf by the University of New Hampshire’s Survey Center online and by telephone.

Each year we ask the owners or managers of residential rental property to take this brief survey to assist New Hampshire Housing in tracking rental housing costs and to provide important housing data to the public. *All information provided to us in the survey is aggregated and kept confidential.*

If you own or manage one or more units of rental housing, please contact us and take the survey. *Because we appreciate that it takes time to complete the survey, after you have completed it online or via phone, you may elect to be entered into a drawing to win one of thirty $100 VISA gift cards.*

New Hampshire Housing will publish the *2020 New Hampshire Residential Rental Cost Survey Report* in June.

*To participate in the survey, please contact Kathleen Moran, Housing Research Analyst, at kmoran@nhhfa.org.*
HOUSING ADVOCACY AND GRANTS
NHHFA provides funding to support local housing advocacy and public education activities. NHHFA also focuses on engaging partners such as local and regional chambers of commerce and economic development organizations. The state's network of workforce housing coalitions, along with Housing Action NH, are key to raising awareness about the need for a diverse and affordable range of housing in our communities. NHHFA provides grants to support the housing coalitions such as Vital Communities (Upper Valley); the Workforce Housing Coalition of the Greater Seacoast; and the Mt. Washington Valley Housing Coalition.

MUNICIPAL TECHNICAL ASSISTANCE GRANT PROGRAM
To provide towns and cities with assistance to address locally identified planning needs, NHHFA partners with Plan NH to administer the Municipal Technical Assistance Grant Program. Municipalities may apply for grants of up to $20,000. A cash match of 25% of the grant amount is required to participate in the program. Additionally, NHHFA staff provide direct technical assistance to municipalities upon request.

NHHFA published A New Hampshire Homeowner’s Guide to Accessory Dwelling Units in 2018 and an ADU guide for local officials in 2017. These guides provide assistance in implementing the Accessory Dwelling Unit statute (RSA 674:71-73). The intent of that law is to expand affordable housing options in New Hampshire communities by encouraging the efficient use of existing housing stock and infrastructure.

HOUSING CONFERENCE SERIES
NHHFA hosts a series of conferences each year for the financial, real estate, lending, development, nonprofit, and other housing-related sectors, as well as public officials and business leaders. These events encourage discussion about ways to address the Granite State’s affordable housing and economic development needs. In 2020, NHHFA will present the Homeownership Conference (March 3), Multi-Family Rental Housing Development Conference (May 29), and Housing and the Economy Conference (October 15).
