

FY 2026 Opioid Use Disorder Supportive Housing Capital Program Notice of Funding Opportunity

Guidance on Matching Resources Scoring Criteria

The FY 2026 Opioid Use Disorder Supportive Housing Capital Program (OUD SHCP) [Notice of Funding Opportunity](#) (NOFO) scoring criteria section 5 (Matching Resources) outlines the requirements for applications to be awarded points based on the number of non-NH Housing matching resources they have applied for or have been committed to the project at the time of application.

The following is guidance on how to calculate the number of points a project may be eligible for based on the identified matching resources.

Example Project:

Points will be awarded for a match equal to the lesser of either each full:

- 5% of the estimated total development cost, OR
- 100% of the requested OUD SHCP funds

above the required minimum commitment of funds outlined in Threshold Criteria #10 (5% of the OUD SHCP award amount).

- Total Development Cost: **\$14,000,000**
- Requested OUD SHCP award amount: **\$2,000,000**
 - 5% of the estimated total development cost = **\$700,000**
 - 100% of the requested OUD SHCP funds = **\$2,000,000**

\$700,000 (the lesser of the two calculations above) would be used to calculate the number of points.

One point (up to 10 points) will be awarded for each matching resource equal to the lesser of each full 5% of the estimated total development cost OR 100% of the requested OUDSHCP funds that have been applied for and are likely to be awarded to the project.

- Project has **\$4,000,000** in non-NH Housing funds that have been applied for and are likely to be awarded
 - $\$4,000,000 / \$700,000 = 5.7$
 - **5 points** awarded

Two points (up to 20 points) will be awarded for each matching resource equal to the lesser of each full 5% of the estimated total development cost OR 100% of the requested OUDSHCP funds that have been committed to the project.

- Project has **\$2,000,000** in non-NH Housing funds that have been committed to the project
 - 5% of requested OUD SHCP award (\$2,000,000) = **\$100,000** for matching resource threshold criteria
 - $\$2,000,000 - \$100,000 = \$1,900,000$
 - $\$1,900,000 / \$700,000 = 2.7$
 - **2.7 (rounded down to 2) x 2 points = 4**
 - **4 points awarded**

5 points + 4 points = 9 points total for this **scoring** criteria in this example project.
