

## [Opportunity Index](#)

### **How to use the Opportunity Index Map in ArcGIS:**

1. Click on the link above to access the opportunity index map.
2. Click the search box and type in the address (street number and name, city/town, zip code, state); click the address that populates while typing the address (it will automatically populate).
3. Data on the left-hand side will appear for that location with the census tract and total points information.
4. Click on the Adobe icon in the upper right corner above the total points information to export the map . Choose the file type.
5. Submit the printout of the map, including the address, with the total points showing with your application to NH Housing.
